ASSIGNMENT 2

Assignment Date	4october 2022
Student Name	Thaboral Grace.S
Student Roll Number	311419106031
Maximum Marks	2 Marks

QUESTION:

Build a python code,Assume you get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

Aim:

To get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature

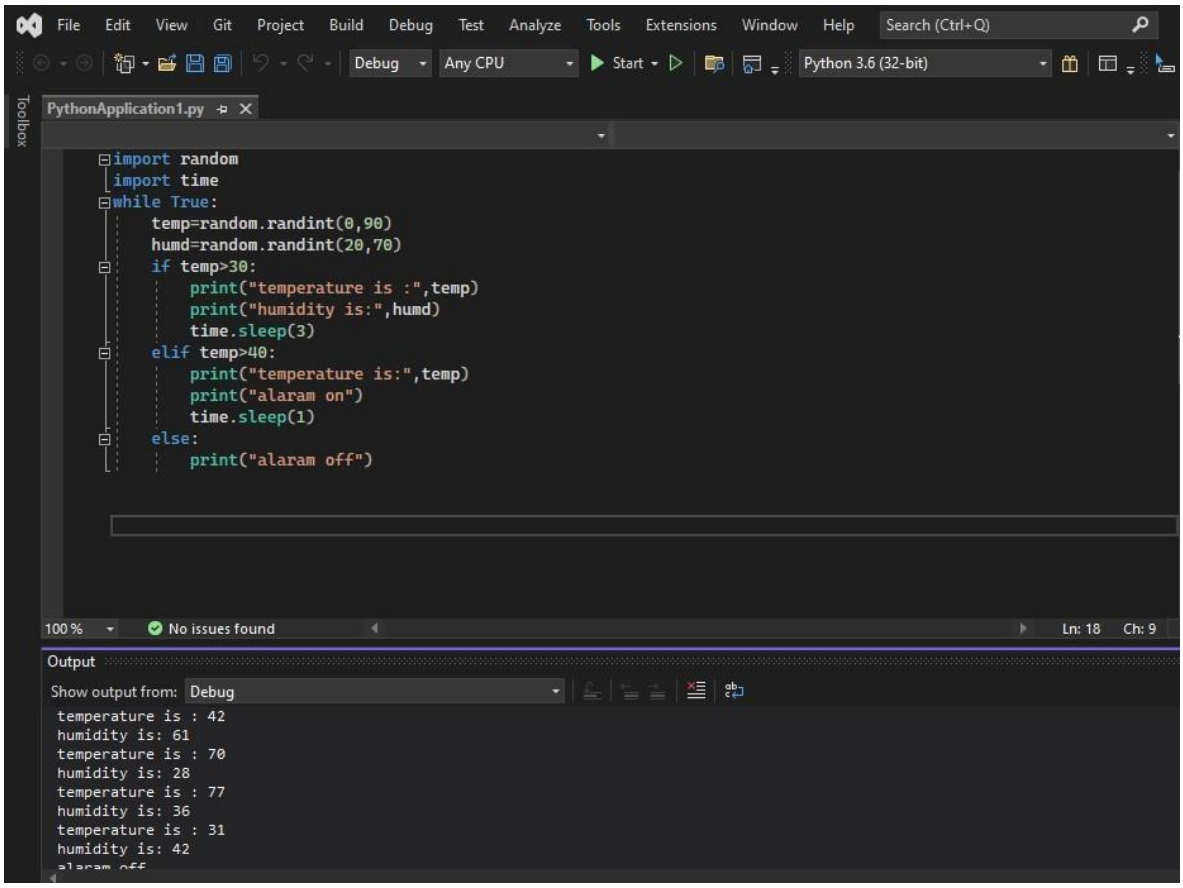
Code:

```
import random import time while
True:
temp=random.randint(0,90)
humd=random.randint(20,70)     if
temp>30:        print("temperature
is :",temp)        print("humidity
is:",humd)
       time.sleep(3)     elif temp>40:
print("temperature is:",temp)
print("alaram on")
time.sleep(1)     else:
print("alaram off")
```

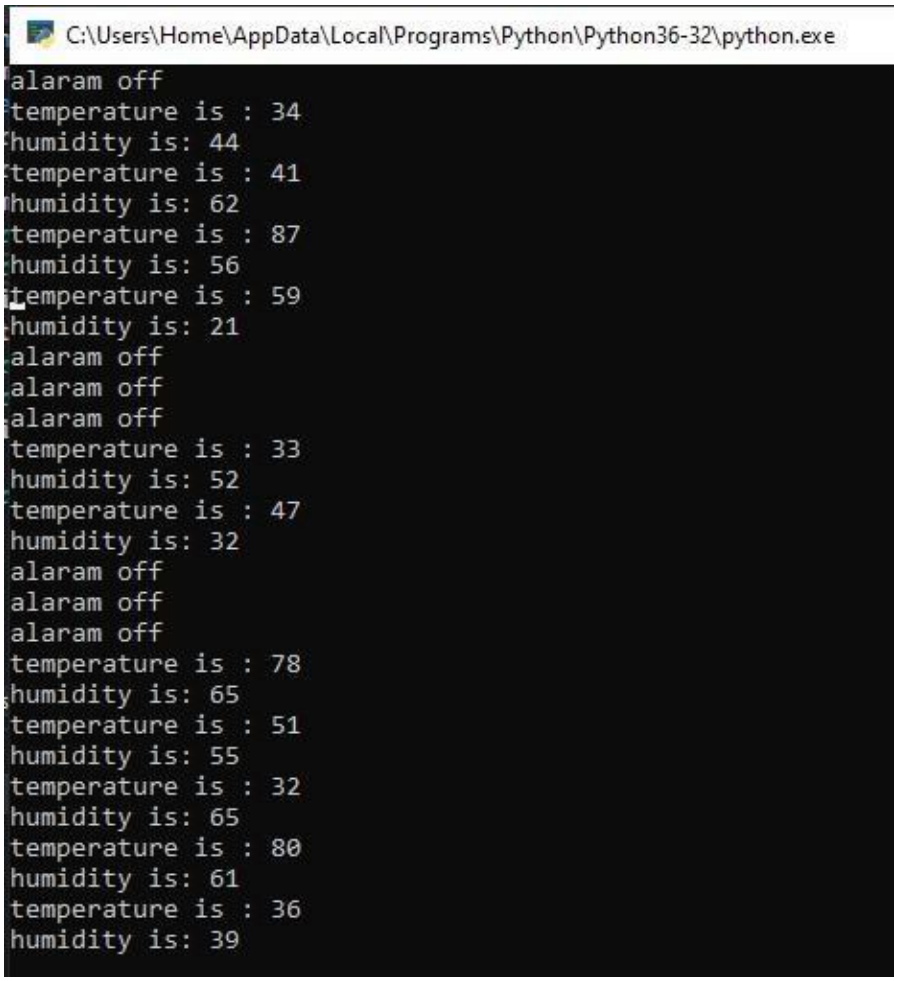
output:

temperature is : 48
humidity is: 55
temperature is : 90
humidity is: 66
temperature is : 57
humidity is: 43
temperature is : 42
humidity is: 32
temperature is : 59
humidity is: 47
temperature is : 42
humidity is: 25 alaram off
temperature is : 80
humidity is: 35 alaram off
temperature is : 55
humidity is: 50
temperature is : 59
humidity is: 42 alaram off
temperature is : 77
humidity is: 48
temperature is : 42
humidity is: 63 alaram off
alaram off

program screen:



Output screen:



Result:

Thus temperature and humidity values are derived and alarm is detected at high temperature.
