

Project Development – Sprint 3

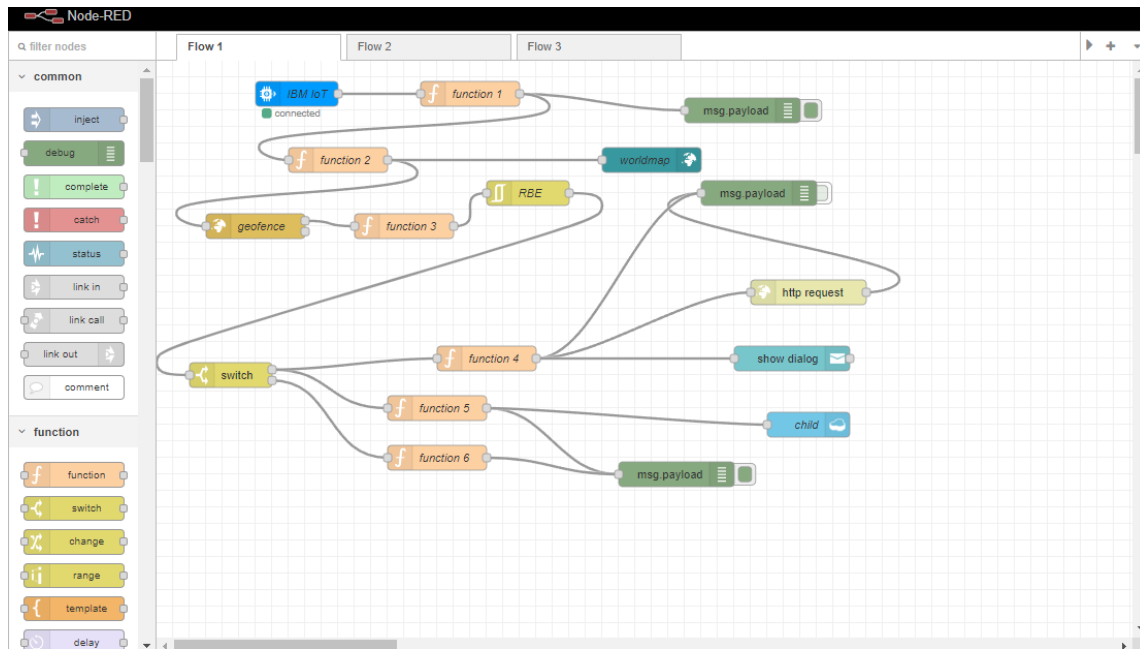

IoT Based Safety gadget For Child Safety Monitoring & Notification

Team id: PNT2022TMID27750

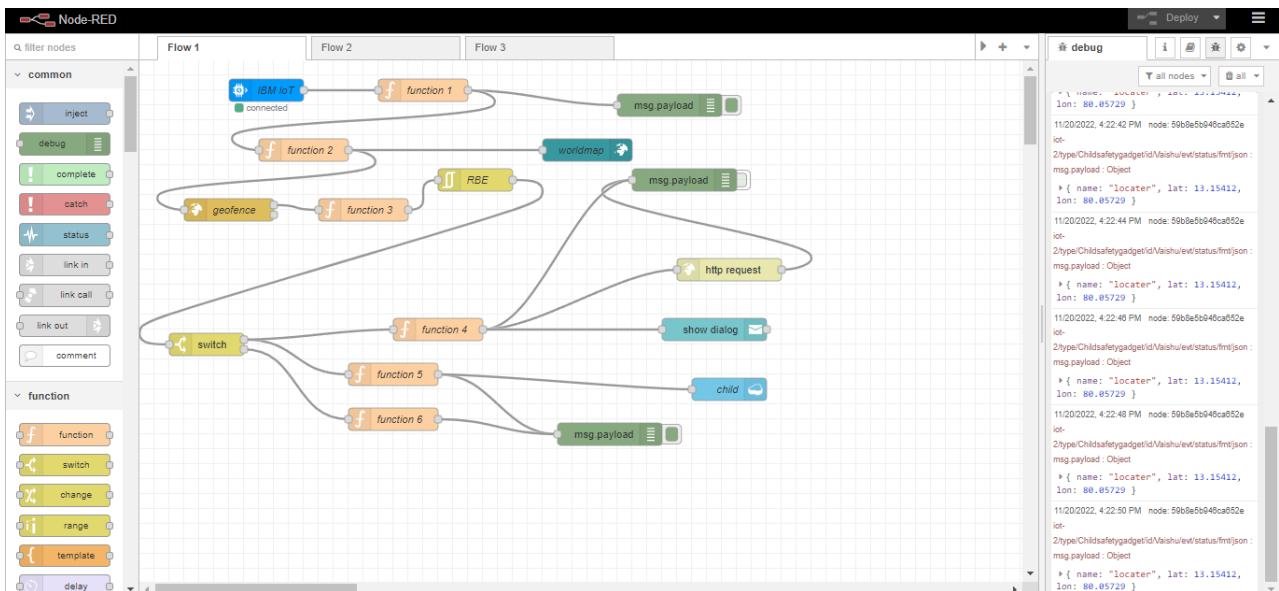

Aim:

Creating Node-Red Service and connecting with IBM cloud and creating cloudant to store database

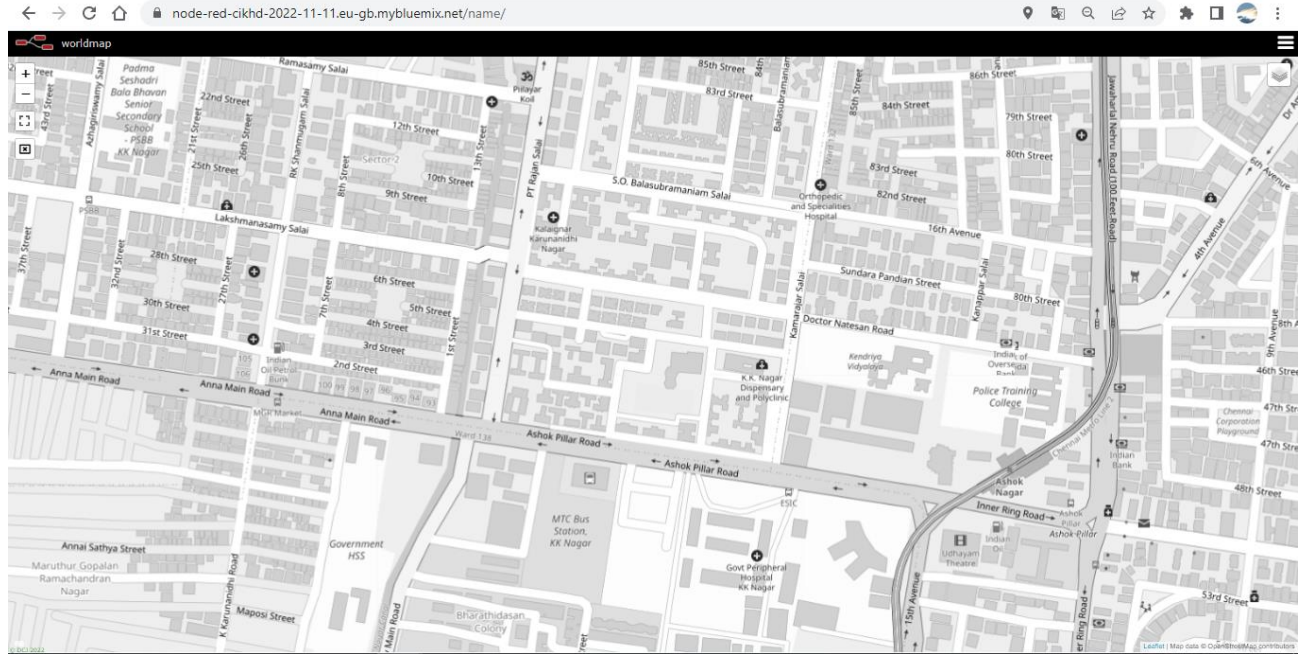

Step 1: creating node red flow

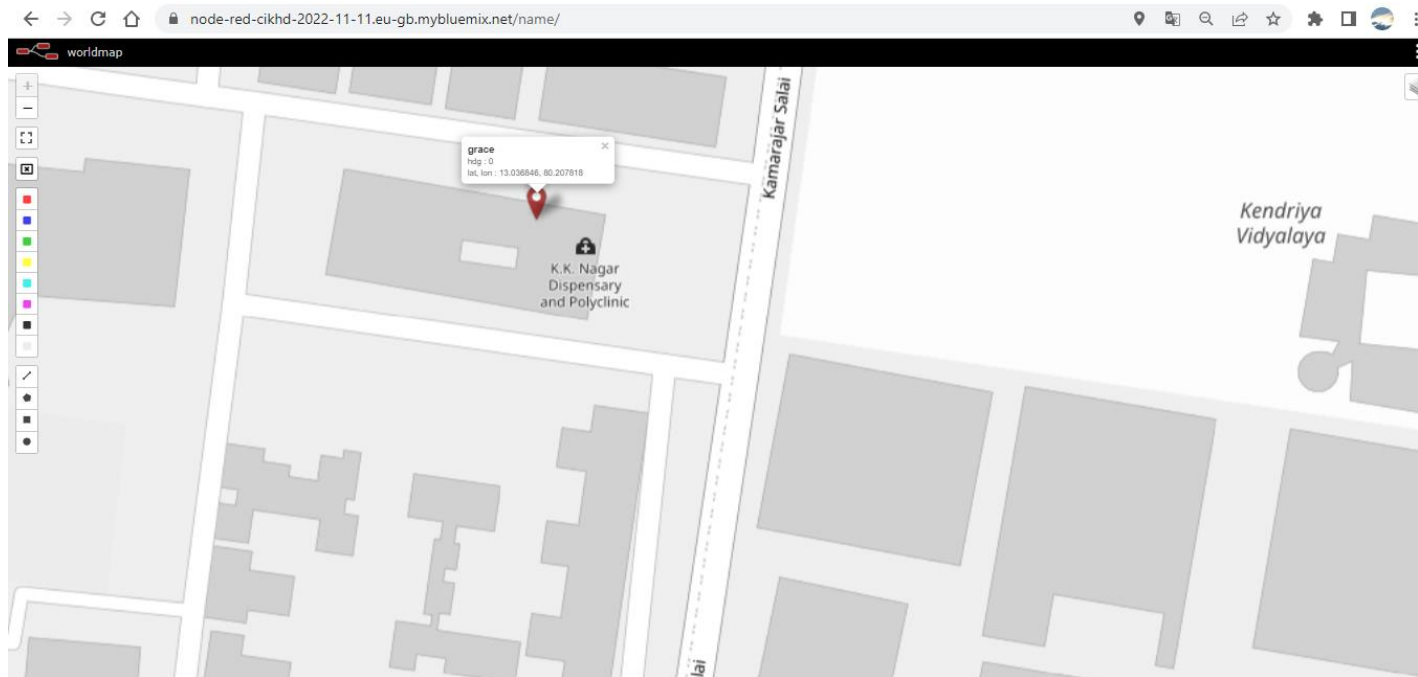

Step 2: deploying flow

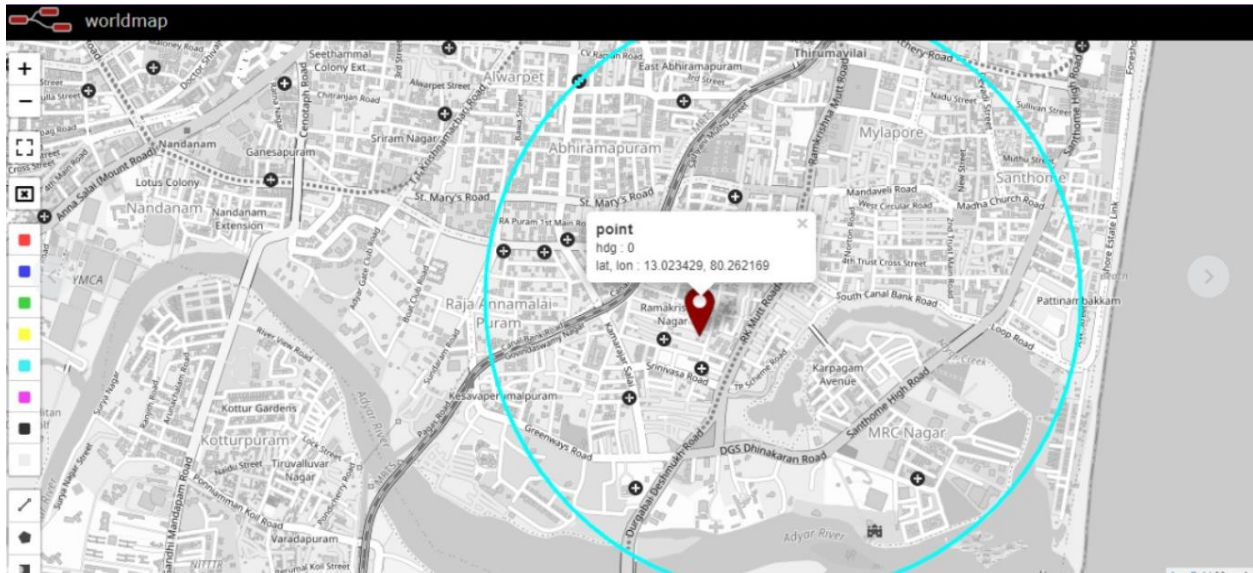

Step 3: Track our location by copying the node red url in new tab

Step 5: giving our name and tracking

Step 6: creating cloudant DB
