

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	22 October 2022
Team ID	PNT2022TMID27744
Project Name	Hazardous Area Monitoring for Industrial Plant powered by IOT
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Installation	USN-1	The technician should install the smart device(Beacons) in the entire area of industrial plant.It obtain the various parameters like temperature and humidity using sensors.	2	High	Sivamadhavan.S
Sprint-2	Data Transfer	USN-2	The smart beacons are connected with cloud services.Beacons transfer its data collected from various sensors to the cloud.	1	High	Vasudevan.M

Sprint-3	Dashboard	USN-3	The web UI is developed and used for connecting the user to the cloud services.	2	Low	Karan R Keswani
Sprint-4	Device Setup	USN-4	Mobile Applications are created using fast SMS API to send alert SMS message from the worker's wearable device.	2	High	Abubakkar Siddiq.A

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	20	05 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	20	12 Nov 2022
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	20	19 Nov 2022

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per

iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
