

experience Journey map

Use this framework to better understand customer needs, motivations, and obstacles by illustrating a key scenario or process from start to finish. When possible, use this map to document and summarize interviews and observations with real people rather than relying on your hunches or assumptions.

to have devices that

self report in real time

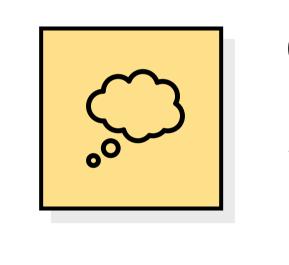

Interactions

What does the person (or group)

What interactions do they have at each step along the way?

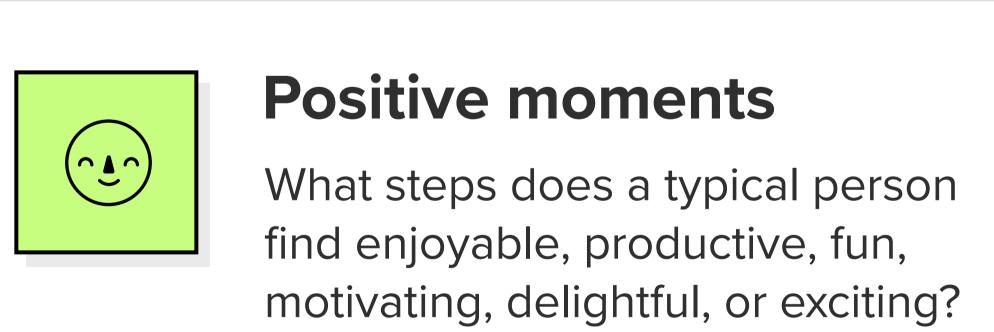

> People: Who do they see or talk to? Places: Where are they?

Things: What digital touchpoints or physical objects would they use?

Goals & motivations

At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")

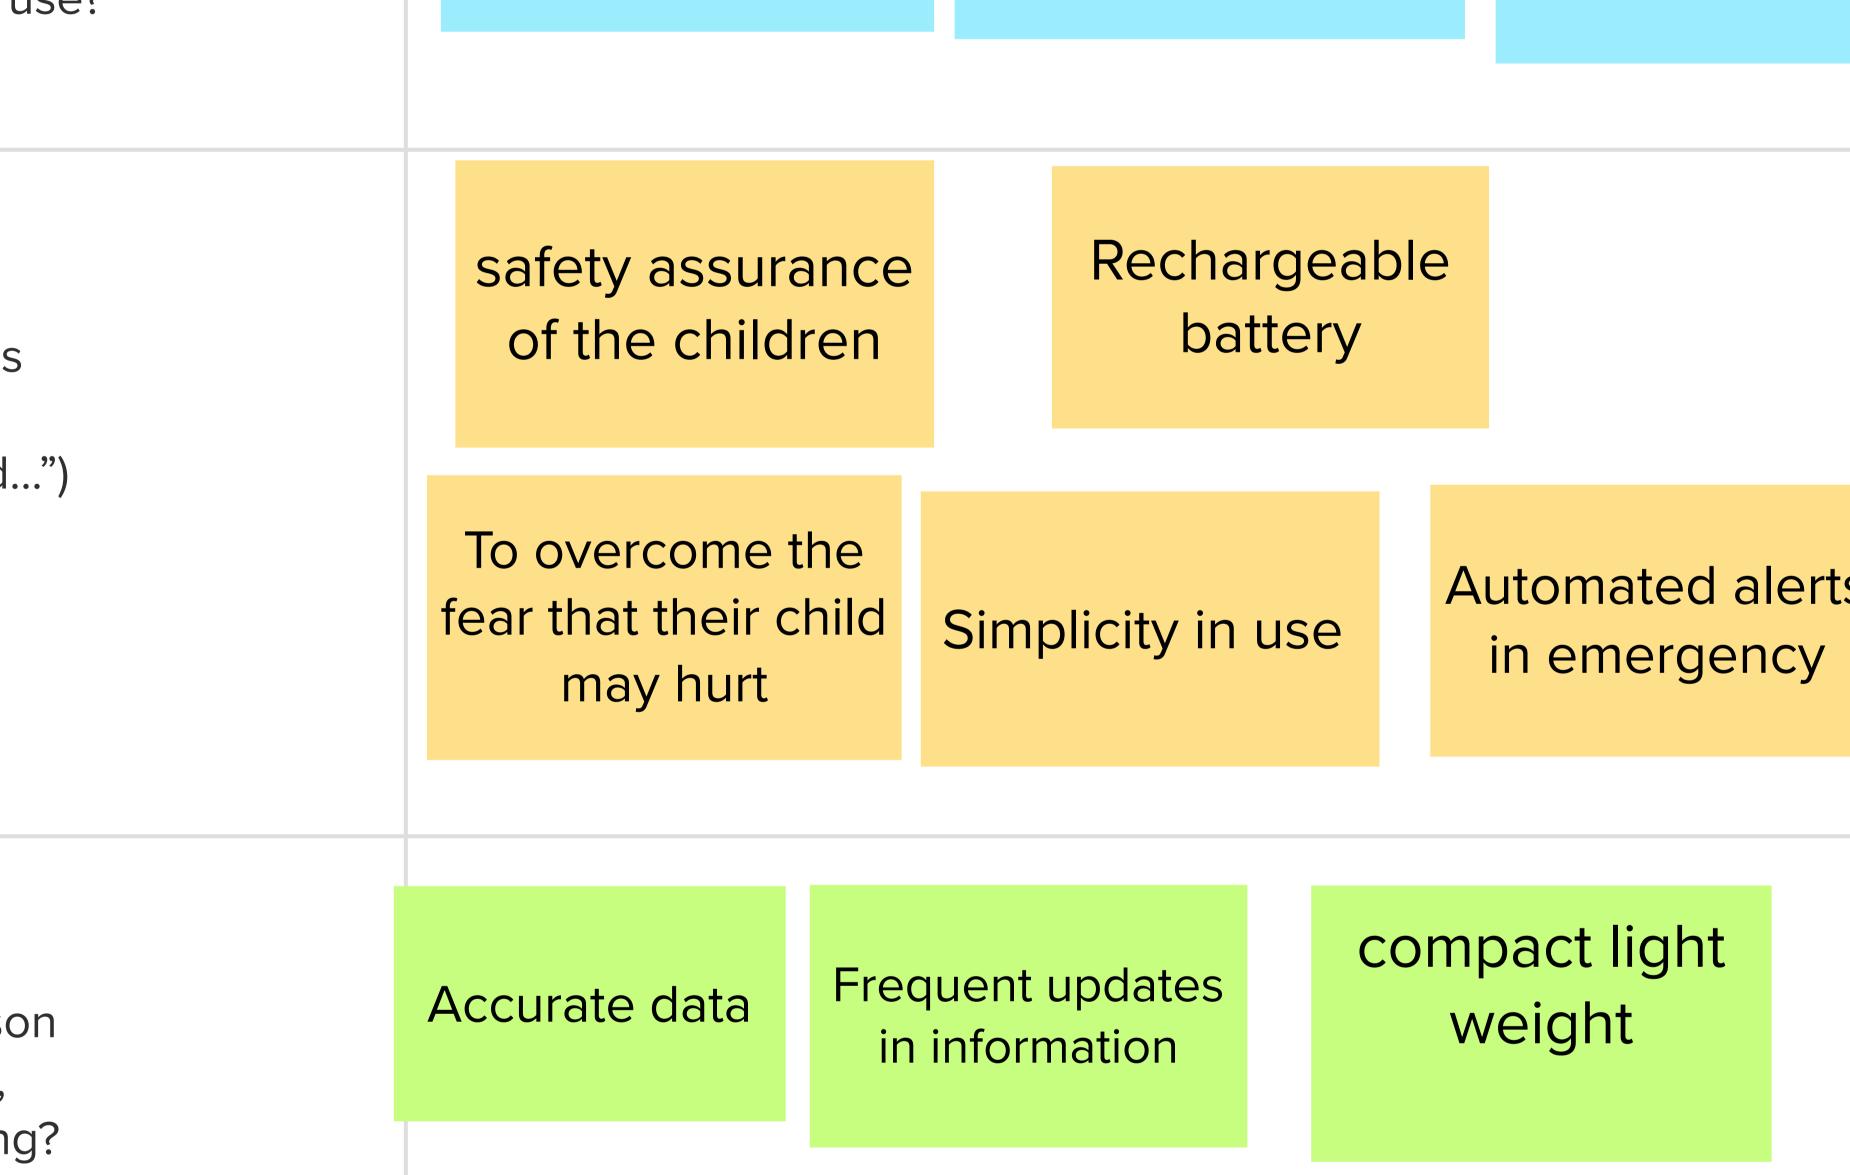

Negative moments

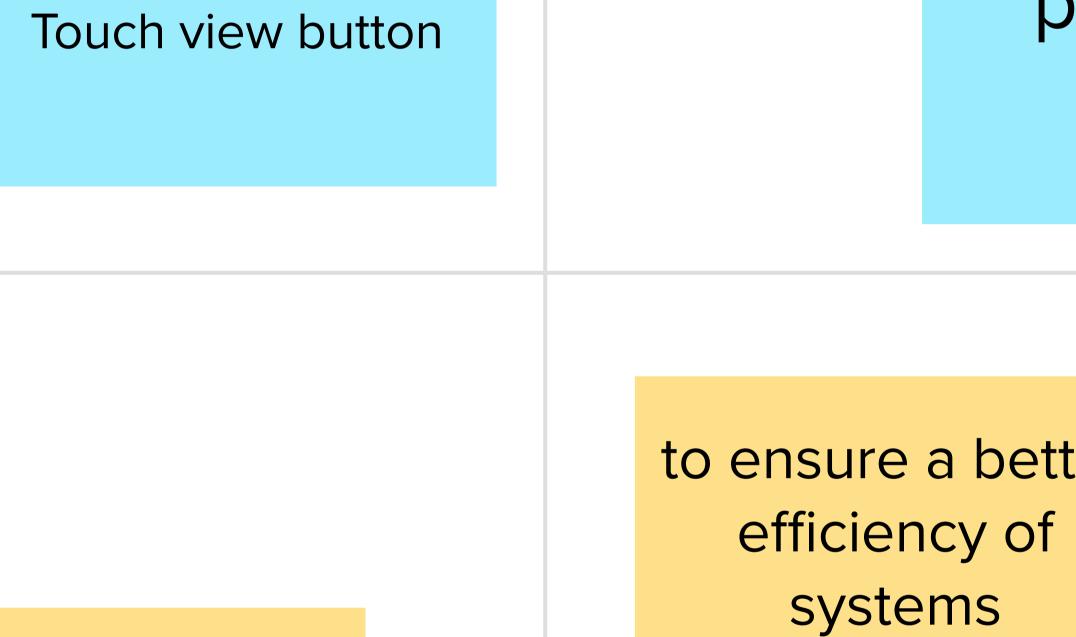

costly, or time-consuming?

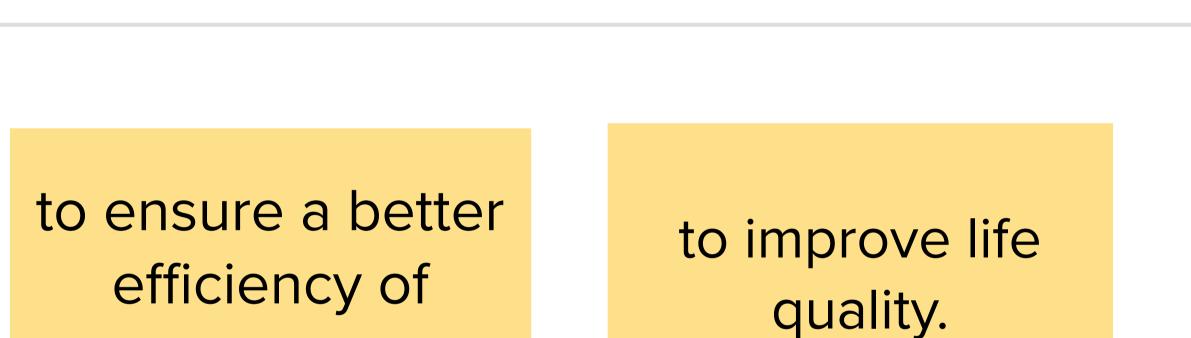

What steps does a typical person

find frustrating, confusing, angering,

interact with the GSM to the message that

facilitates

between device

and cloud

higher cost

Better use of resources and assets

emergency alerts

End point management

Inability link all the

data together and

process it effectively

complex system for maintenance

Inventing new things and integrating the previous ones with the new ones demands effort and money

> Incompetence in establishing same technology standards to make all connected devices 'understand' each

The details of the baby can be sent to parents through Wi-Fi module.

The new devices grow gradually, so

Inability to deal with security and data privacy threats

time is needed

.The device sends the monitored

Areas of opportunity

How might we make each step better? What ideas do we have? In these two

integration

complexity

This device procures information such as heart rate, physical body

power dependence

resistance of the body is changed in abnormal conditions. This This work deals with body temperature relationship between them.
